Subject: Microsoft Settlement

Dear Ms. Hesse:

As a public citizen, I wish to express the opinion that this civil anti-trust case against Microsoft should be settled according to the terms of the agreement set forth by the high Federal court as quickly as possible. Microsoft is a leading technology company whose products are socially beneficial towards educational institutions and helping the underprivileged to improve their cognitive skills. Their pioneering role directly impacts the American technology business sector and the U.S. economy positively, in the spirit of "laissez-faire" capitalism. Settle now. Thank you. James Wing
